### International Courses: ___ Credits Needed

9 credits of international courses are required. If students test out of the language requirement, 15 credits are required. One course from each course category must be taken. A course may only satisfy one category of the minor.

Requirements for the International Minor for Engineers

The International Minor requires 16 credits of university-level coursework to complete. These 16 credits may include coursework taken at UM, study abroad courses, or transfer credit from another university. It does NOT include prerequisite courses (first-year language for the minor), AP, placement credit or credit by exam.

Pre-requisites for Declaring Minor

- Two semesters of College Level foreign language or equivalent (cannot be English or dead/extinct language).
- May be satisfied by a placement exam or transfer credit.
- Good academic standing based on an earned UM GPA (minimum 2.0).
- Transfer students are eligible to declare during their first semester at UM.

Foreign Language Proficiency

- Foreign language proficiency (cannot be English or dead/extinct language) equivalent to fourth-semester College-level.
- May be satisfied by UM courses, transfer credit, or intensive language programs abroad.
- Students may fulfill the language proficiency requirement using AP credit or test credit, however those credits cannot be used toward the 16-credit total: these students must fulfill the 6-credit requirement by completing a combination of: additional credits of the same foreign language (advanced level) or additional courses from the international sequence or Comparative Perspectives list.
- For students who complete the language proficiency using UM courses or transfer credit, up to 6 credits of 3rd and 4th semester language courses can be used toward the 16-credit total
- International students can use the language of their home country as their foreign language, but they must be able to demonstrate proficiency on their UM transcript (i.e. placement test credit or AP credit for the specified language).

International Courses

- Courses that focus on non-US cultures or countries. Students are encouraged to select at least one International Course that is designated as humanities (HU) to satisfy the CoE Intellectual Breadth requirement.
- 9 credits of International Courses are required (If students test out of the language requirement, 15 credits of International Courses are required)
- At least 3 credits must be completed at the 300-level or above.
- One comparative perspectives course from the approved list (available online)
- Language courses in student’s proficiency language that are 5th-semester or above, or beginning-level courses in language courses other than student’s proficiency language may be used

Engineering Across Cultures Course (1 credit)

- Role of culture in engineering design and problem solving.
- Global trends in engineering and business.
- Exposure to engineering work in various countries through guest speakers and self-directed research.

Relevant Overseas Experience

- Study, work, research, or organized volunteer work outside the U.S.
- International students may not satisfy this requirement through programs in their home countries.
- Program must provide opportunities to develop at least two of the International Minor's core skills: foreign language proficiency, knowledge of non-U.S. cultures/societies, intercultural communication skills, or awareness of global trends in engineering/business.
- Minimum of 6 week program length.
- International experience programs sponsored by or reviewed by the College’s IPE office do not need pre-approval. Other programs, including those from other service providers or those you develop on your own, do need approval from the Faculty Advisor prior to departure.

Other

- Pass/Fail courses may not be used to satisfy minor requirements, unless the course is only offered as pass/fail (meaning no option exists to take the course for a grade).
- Transfer credit may be used to satisfy minor requirements.
- Students must maintain good academic standing in minor courses to earn the minor.
- International Minor courses may be double-counted with Engineering core and department requirements, including CoE minors.
- Students who wish to double-count International Minor courses with LSA minor requirements should consult with their LSA minor advisor to determine if this is allowed.
